GLOSSARY & DEFINITIONS

**Basic Plan:** a plan approved in conjunction with a ZMA for a CDZ. This plan identifies the general location of the different land uses within the project, and the general location of access to property from outside roads, as well as a general design for internal road system. This plan does not contain any specifics as to building locations, density, etc. This is the first step in the CDZ process.

**CDP:** **Comprehensive Design Plan:** the second step in the CDZ process where, among other aspects of the project, comprehensive design details including land uses, densities, non-residential land uses, access to the project, setbacks from streets and property lines, and buffering are approved.

**CDZ:** **Comprehensive Design Zone:** a special zoning district requiring multi-step review of development proposals which are typically more intensive than a traditional subdivision, and may consist of a mixture of residential, commercial, office, or institutional uses. *(NOTE: Projects marked with an asterisk (*) are projects in a CDZ.)*

**Cluster Subdivision:** a Preliminary Subdivision Plan which is not within a CDZ, where lot sizes are reduced and grouped more tightly than would normally be permitted within that zone in exchange for preserving environmental characteristics including steep slopes, flooded areas, 100-year floodplain and wetlands, etc., in the form of common open space.

**DSP:** **Detailed Site Plan:** a detailed design plan similar to an SDP, required for special subdivisions such as cluster developments within a standard zoning district, not a CDZ. Two aspects of the DSP are architectural and landscaping plans.

**Preliminary Subdivision Plan:** the County process for legally dividing property into smaller parcels such as lots for sale and development. Except for projects within CDZ’s, or for special subdivisions such as cluster developments within a standard zoning district, no further public review may be necessary beyond this stage in the development process before proceeding to Record Plat (or final plat) and then to the issuance of building permit(s).

**Final Subdivision Plan:** a plan which is placed in the County Land Records to record and establish property boundaries on parcels created through a Preliminary Subdivision Plan to permit the lawful sale of the parcel(s).

**SDP:** **Specific Design Plan:** a detailed plan identifying precisely where all improvements such as roads, buildings, landscaping, entrance drives and trails, etc., will be located in a CDZ project. This is the third step in the CDZ review process. Architectural plans are a part of this review process.

**Special Exception:** a land use not permitted by right in a zone unless the use is found to meet very specific criteria, and will have minimal or negligible impacts on adjacent properties.

**WSSC:** Washington Suburban Sanitary Commission: a bi-County agency responsible for providing public water and sewer service outside of the City’s public sewer and water system.

**ZHE:** **Zoning Hearing Examiner:** a quasi-judicial official of the County responsible for reviewing and preparing a written recommendation for ZMA’s and Special Exceptions as to conformity with County laws and ordinances.

**ZMA:** **Zoning Map Amendment:** a proposal to change the zoning of land to permit a use other than or in addition to that previously permitted on the property.

**SMA:** **Sectional Map Amendment:** a comprehensive rezoning for an entire planning area that systematically considers zoning and land use issues in conjunction with approval of a Master Plan.

**NOTE:** Staff Contacts may be reached at 301-809-3047.

DEVELOPMENT SITES OUTLINE
PIPELINE PROJECTS

"Pipeline" projects are generally identified as major projects for which an official subdivision or zoning application has been filed, is under review, or a decision is pending. Also, pipeline projects include properties such as surplus schools undergoing renovation/re-use, active projects with approved Water and Sewer Systems Area changes, and projects under construction. (NOTE: Projects marked with an asterisk (*) are projects in a CDZ).

P-1 BOWIE STATE UNIVERSITY DORMITORY/RETAIL SPACE
Zoning: O-S (Open Space)
Proposed Land Use: A 169,188 gross square foot, 500 bed dormitory with a first floor commercial component to house an entrepreneurship and incubation center
Project Status: Under design; site work is expected to commence in early 2020; occupancy expected in July, 2021.
Project Contact: Mr. Michael Harris
Bowie State University
301 860 4191

P-2 SADDLEBROOK ESTATES (formerly Colt's Neck Subdivision)
Zoning: O-S (Open Space)
Proposed Land Use: Eight (8) single-family detached units and conservation lot
Project Contact: Morris & Ritchie Associates, Inc.
Mr. Daniel Jackson, P.E.
410-792-9792

P-3 BOWIE MARKETPLACE
Zoning: C-S-C (Commercial Shopping Center)
Proposed Land Use: 131,558 square foot retail shopping center
Project Contacts: Berman Enterprises
Mr. Brian Berman
301-816-1555
Gingles, LLC
Mr. Andre Gingles
301-572-5009

**P-8  BUCKINGHAM AT BELAIR**  
0.75 acres  
Zoning: R-55 (One-Family, Detached Residential)  
Proposed Land Use: One single-family dwelling
**P-9 MELFORD (FORMERLY MARYLAND SCIENCE AND TECHNOLOGY CENTER)**

466 acres

**Zoning:** M-X-T (Mixed Use, Transportation Oriented)

**Proposed Land Use:** Mixed use employment park

**Approvals:**
- Rezoning from R-R to E-I-A and Basic Plan for up to 6.4 million square feet approved, 1982.
- Comprehensive Design Plan approved, 1986.
- Specific Design Plan for 117,000 square foot Supercomputing Research Center approved, 1986.
- Specific Design Plan for 130,000 square foot U.S. Census Bureau Computing Facility approved, 1994.
- Preliminary Subdivision Plan for 1.95 million square feet in the E-I-A zone re-approved, 1999.
- Specific Design Plans for 300,000 square feet in two (2) four-story office buildings, 30,450 square feet in a one-story office building, 160,000 square feet in four (4) one-story office-flex buildings approved, 2001.
- Specific Design Plan for 83,000 square feet in three (3) flex-office buildings approved, 2002.
- Preliminary Subdivision Plan for three (3) parcels in Phase 2 approved, 2003.
- Specific Design Plan for a 234,000 square foot campus (International Masonry Institute) containing a two-story, 60,500 square foot national training center and office, a three-story, 45,500 square foot main building and dormitory approved, 2003.
- Specific Design Plan for two (2) stormwater management ponds approved in 2003 and redesigned and re-approved, 2004.
- Specific Design Plan for 81,600 square feet in two (2) office buildings approved, 2004.
- Specific Design Plan for a 234,000 square foot campus (International Masonry Institute) 125,000 square foot corporate office (Phase 2), and a 5,000 square foot dormitory addition (Phase 3) approved, 2005.
- Specific Design Plan for a 40,440 square foot, one-story flex building and a 27,990 square foot, two-story office building approved, 2005.
- Preliminary Subdivision Plan for nine (9) parcels approved, 2008.
- Detailed Site Plan for 134,480 square feet in four (4) office buildings and 248,820 square feet in seven (7) research and development buildings approved, 2008.
- Detailed Site Plan for comprehensive signage proposal approved, 2011.
- Conceptual Site Plan revision for a mixed use development containing up to 2,500 single-family attached and multi-family residential units, 260,000 square feet of office space and 268,500 square feet of retail space (Melford Village) approved by District Council, 2015. Opponents appealed to Circuit Court and case was decided in favor of Prince George’s County. Opponents appealed and case is awaiting a decision.
from the Court of Special Appeals. Detailed Site Plan for a four-
story, 110,000 square foot, 140 unit assisted living facility (Thrive)
approved by County Planning Board and Preliminary Plan of subdivision
for 1,793 dwelling units, including 293 townhouse units, 1,000 multi-family
market rate units, 500 senior age-restricted multi-family units and 528,500
square feet of commercial and office uses approved, 2016. Final
subdivision plan and building permit approved for 140 unit assisted living
facility, and building permit for a 137-room/5-story Courtyard hotel
building approved, 2017. Remaining currently approved development at
St. John Properties portion includes 167,320 square feet of R&D/Flex,
51,680 square feet of single-story office, 42,000 square feet of three-story
office and 24,375 square feet of retail. Detailed Site Plan for 388-
unit/461,819 square foot, multi-family building (The Aspen) on 6.62 acres
approved by City and County, 2018. Detailed Site Plan for 57,845 square
feet of retail/commercial space in five buildings on 8.83 acres, approved
by City 2018 and by County 2019. Detailed Site Plan for 435 multi-family
dwelling units/705,919 gross square feet in nine buildings and a
clubhouse building (Melford Mansions) on 53.95 acres, approved by City
2019. Detailed Site Plan for Infrastructure for a future multi-family
residential wrap with 472 dwelling units (The Berleigh) on 5.54 acres,
approved by City 2019. A revised Detailed Site Plan and Final
Subdivision Plan for The Aspen development for a 1,152 square foot bath
house approved, 2019. 140-unit /116,081 square foot assisted living
facility (Thrive) on 3.14 acres, completed and opened 2019.

Construction Status:
1,213,270 square feet, Courtyard hotel and 140 unit assisted living facility
completed, 2019. Two 34,560 square foot flex buildings (5041 and 5061
Howerton) under construction.

BOWIE AREA
TRANSPORTATION PROJECTS

T-1  The Bowie Heritage Trail (City)

The City awarded a construction contract for the portion of the Phase 2 of the Bowie Heritage Trail project, which includes and creation of a new park/playground on 10th Street, as well as an extension of the Phase 1 trail to 9th Street. There is currently no funding for creation of an educational plaza at the Railroad Museum (also part of Phase 2). The Jericho Park segment (ultimately 1,415 linear feet) connecting Jericho Park to the Adnell subdivision achieved final design approval in FY 2017.

T-2  Chestnut Avenue Bridge Replacement (County)

The project replaces the Chestnut Avenue bridge over Newstop Branch and reconstructs the approach roadways. The existing 19 foot span steel and reinforced concrete bridge is experiencing deterioration and is in need of structural replacement. Design Stage, 20% complete. All funds for planning moved up from Years 1-2 to Year 1 and for land acquisition moved up from Years 1-3 to Years 1-2. All construction funding appears in Year 3.

T-3  The Bowie Heritage Trail/WB & A Spur Trail/Patuxent River Bridge Crossing (M-NCPDC)

This trail is a northern extension of the City of Bowie’s planned Heritage Trail. It will extend from the Bowie State/MARC train station eastward through Bowie State University to the PEPCO power lines. This section of trail will provide a way for pedestrians and bikers in Old Town Bowie to access the existing WB & A Trail and the new Horsepen Trailhead. When The Bowie Heritage Trail is constructed by the City of Bowie, a loop trail system will be created. The WB & A Spur Trail, between the Horsepen Branch Trailhead and the PEPCO power lines, was completed in 2016. A 1,200 linear foot, asphalt trail between the campus Loop Road and the State of Maryland property completed, 2018. A related project to construct a bridge over the Patuxent River is a cooperative effort between the State of Maryland, Anne Arundel County, and Prince George’s County. Under a Memorandum of Understanding, Anne Arundel County is managing the design process for this project. The 90% engineering design plans are completed and under permit review. A construction agreement is nearing completion.

T-4  MD Route 197 North Landscaping/Streetcape (SHA)

This project involves creation of a concept plan for the corridor, from relocated Route 450 to Rustic Hill Drive. A task force consisting of local residents and business owners met regularly during 2000 and developed a proposal to convert the continuous center turn lane to a landscaped median and to install other streetscape improvements to enhance the safety and appearance of the corridor. City Council approved a concept plan and recommended the proposal to SHA, 2002. Funding for preliminary engineering placed on indefinite hold due to State budgetary constraints.

T-5  Race Track Road Reconstruction (County)

This major project involves roadway reconstruction and the design of pedestrian improvements on Race Track Road, from Clearfield Drive to Marquette Lane, to upgrade safety and operations. The primary objectives include increasing safety for all roadway users, enhancing accessibility, providing continuous pedestrian facilities, and maintaining infrastructure in a state of good repair. Proposed improvements include: relocation of the current Yorktown Elementary School driveway entrance; installation of a new traffic signal at the relocated school driveway entrance to operate in tandem with Grace Baptist Church and Church of the Redeemer driveways; installation of pedestrian activated signals at the new crosswalks;
construction of a hiker-biker sidewalk on the northbound side of Race Track Road that extends along the length of the project and installation of a continuous sidewalk on the southbound side; reconfiguring and resurfacing of the Yorktown Elementary School's parking lot; upgrading the traffic signal at the intersection of Race Track Road, Marquette Lane, and Idlewild Drive; upgrading existing street lighting to include LED lighting fixtures; stormwater management (SWM) environmental site design practice installation; complete roadway resurfacing, and select full depth pavement patching; new high visibility signage; roadway drainage improvements and pavement underdrain; and landscaping. Current schedule includes advertisement of the project by late 2020, construction starting in mid-2021 and completion by late 2022.

**T-6 MD Route 450 (Annapolis Road) (SHA)**

This project consists of design and engineering to upgrade the section of MD Route 450, from a point approximately 1,000 feet east of its intersection with Stonybrook Drive, to MD Route 3 to a multi-lane divided highway (1.37 miles). Planning studies were completed for this segment in 1988. No right-of-way or construction funds are programmed in the State Consolidated Transportation Program (CTP). Engineering is approximately 95% complete. Project is on hold. Traffic volume in 2018 was 25,500 average vehicles per day; projected traffic volume for the Year 2040 is 39,500 vehicles per day.

**T-7 MD Route 197 from Kenhill Drive to MD Route 450 (SHA)**

This project would consist of the planning required to convert this segment of MD Route 197 to a four-lane roadway with medians and significant landscaping to relieve congestion and improve safety. Project planning approval obtained in December, 2009 for "Alternative 4 With Sidewalks and Street Trees". Engineering underway. In 2018, the average daily traffic was 35,400 vehicles per day, and it is projected to be 42,500 in the Year 2040.

**T-8 MD Route 197 South Landscaping Plan (SHA)**

This project involves installing landscaping in the median of MD Route 197, between US Route 50 and US Route 301 to improve the appearance to travelers entering our community. A task force, formed with the objective of creating a landscape concept plan for this section of MD Route 197, submitted its final report to Council in February 2000. Shade trees were installed in 2014.

**T-9 MD Route 3 (SHA)**

This project consists of a study to upgrade MD Route 3 from US Route 50 to MD Route 32 (8.9 miles) to address safety and capacity concerns. The project would improve safety and relieve traffic congestion in this heavily traveled corridor. Planning complete. In 2018, the average daily traffic range was 68,700 – 87,900 vehicles per day, and is projected to grow to 86,100 – 133,500 vehicles per day in the Year 2040. Intersection safety improvements on southbound MD 3 at Forest Drive are under construction.

**T-10 Melford-Kenilworth Sidewalk Extension (Developer)**

This project includes installation of five foot wide sidewalk within the rights-of-way of MeIford Boulevard and Belair Drive to provide for a continuous, off-road public access connection between Kendale Lane in the Kenilworth neighborhood to Science Drive in Melford, including crosswalks and pedestrian activated crossing signals at the MD 3/Belair Drive interchange. Design plans and permits are approved.
T-11 Governors Bridge Reconstruction (County)

This project replaces the existing structure over the Patuxent River. Prince George’s County Department of Public Works & Transportation held a public informational meeting in October, 2018. After a second public meeting held in 2019 to review the results of the Alternatives Analysis, DPW &T chose the No Build Alternate, thereby abandoning the improvement project.

T-12 US Route 301 Improvements, including US Route 301/MD Route 197 Interchange (SHA)

This project consists of the planning and preliminary design of a new interchange and a continuous, fully integrated frontage road system. This project is necessary for the continued safe and efficient movement of traffic into, out of, and through the City. A focus group concluded its review of design alternatives, and SHA conducted a public hearing on the selected alternatives in 2002. Project Planning approval obtained in 2009 for "Alternative 2 With Roundabouts" option. Bicycles and pedestrians will be accommodated where appropriate. Improvements are needed to accommodate the existing and projected high volumes of traffic generated by continuing growth along the US 301 corridor and to address existing safety problems. Traffic volume in 2018 was 66,500 average vehicles per day on US 301/20,000 on MD 197; projected traffic volume for the Year 2040 is 74,500 vehicles per day on US 301/24,900 on MD 197. Project is on hold.

T-13 US Route 301 South Corridor Transportation Study (SHA)

This is a multi-modal corridor study to consider highway/transit improvements from the Potomac River to the US Routes 301/50 interchange in Bowie (50.3 miles). This study will address transportation needs and consider related environmental and growth management issues. Average daily traffic volumes in Prince George’s County range from 100,400 vehicles per day in 2018 to 127,400 vehicles per day in 2040. Planning is on hold.

T-14 US Route 301 Improvements (Prince George’s County)

This project consists of the improvement of US 301 by providing a third through lane north and south bound between MD 214 and MD 4 and further widening as needed, at Trade Zone Avenue, MD 214 and MD 725. Associated intersection improvements at Old Central Avenue, Trade Zone Avenue, Leeland Road and Village Drive West will also be undertaken. This project is necessary to provide satisfactory levels of service during peak periods at the intersections along US 301 should State Highway Administration planned improvements be delayed. It provides for increased capacity to accommodate planned development in this area as well as enhanced safety for the traveling public. $190K construction funding added to Year 1 and project cost increased by $190K. $24M construction funding remains in Beyond Six Years. Design not begun.

T-15 Leeland Road Improvements (Developers)

There are planned frontage road improvements for Leeland/Oak Grove Road as part of the Willowbrook and Locust Hill projects. The road will ultimately be designed and re-constructed to a minimum of two lanes, with shoulders from the MD Route 193 roundabout to US Route 301. Several specific improvements are planned:

- The developer of Beech Tree will replace the culvert under Leeland Road located 2000’ west of Moores Plains Boulevard. The road is currently closed temporarily for this culvert work.
• The developer of Willowbrook and Locust Hill will eventually be required to improve Leeland Road. The exact configuration of this improvement has not been fully determined. These projects will be required to improve the road along the project frontage which starts at Church Road on the west side and ends about 2000’ west of Moores Plains Boulevard.

• The developer of Oak Creek Club will improve Oak Grove Road from Church Road to approximately Whistling Duck Drive.

• The First Baptist Church of Glenarden will improve Oak Grove Road from about Whistling Duck Drive to MD 193 circle.

T-16 Hall Road (SHA, MNCPPC, City)

Roadway widening, curb, gutter and sidewalks are planned, specifically to address the need for sidewalk connectivity and pedestrian safety from Pointer Ridge Drive to Hall Station Drive, including a crossing of the CSX railroad tracks. Both the City and County are partnering with SHA to complete pedestrian improvements that will ensure safe access to the South Bowie Library. In 2018, SHA completed a segment of sidewalk retrofit between the CSX railroad tracks and Hall Station Drive. The Maryland-National Capital Park and Planning Commission is working with SHA to engineer a pedestrian project to cross the Collington Branch, connecting Pointer Ridge Drive with the crossing of the CSX railroad tracks. The MNCPPC project cost of $400K remains in the County CIP.

T-17 Church Road (County)

This project provides geometric and safety improvements to Church Road between Woodmore Road and MD Route 214 (Central Avenue). Improvements will include intersection improvements, some local realignment of the roadway, and the addition of shoulders and roadside drainage where necessary. Developer-funded improvements of the portion between US Route 50 and Fairwood Parkway were completed in 2006, and developers completed the segment between Woodmore North and Dixon Crossing, from MD Route 450 to Loganville Street in 2012. Prince George’s County completed a major intersection reconstruction at Woodmore Road/Mount Oak Road in 2011. The Church Road Task Force final report was presented to the City and County, 2005. This improvement is needed to enhance safety along the roadway. All funding remains in the Beyond 6 Years category in the FY 2020 - 2025 CIP.
