Prince George's County Announcement about Boosters

Based on updated CDC guidance, the Prince George's County Health Department's COVID-19 vaccine clinics is offering booster shots of Pfizer to:

- people 65 or older
- people aged 18 to 64 years with underlying medical conditions that put them at increased risk for COVID-19
- people aged 18 to 64 who work or reside in certain settings (e.g., health care, schools, grocery workers, correctional facilities, and homeless shelters) that increase their risk for COVID-19 exposure and transmission.

If you are in one of those groups, the county recommends that you get the booster shot at least six months after receiving your second dose of Pfizer. Residents do not have to show proof at our clinics that they are eligible to receive a booster shot.

Visit mypgc.us/COVIDvaccine for more information about COVID-19 vaccinations including locations and hours of operation for vaccine clinics operated by the County and other public and private organizations.

Red Cross Needs Blood Donors

The American Red Cross is facing an emergency blood and platelet shortage as the nation returns to in-person workplaces and schools amid a surge in COVID-19 cases. Donor turnout has reached the lowest levels of the year, decreasing by about 10% since August. To schedule a blood donation, visit redcrossblood.org or call 1-800-733-2767.

Reminder: Hydrant flushing is underway in neighborhoods served by the City of Bowie Water System. Please view the schedule at www.cityofbowie.org/flushing.
